

**CAPACITY BUILDING  
AND  
SKILL ENHANCEMENT  
5.1.2**

**Institution initiatives for  
Capacity building and skill enhancement**

L. S. Raheja School of Architecture encourages and practices a learning environment where students are given many platforms and opportunities for enriching themselves with capacity building and skill enhancement activities.

It actively engages in events, extracurricular activities and inclusion of value added Elective course work for the students consistently throughout period of 5 years of education.

The Capacity building and Skill enhancement includes development in the following areas

1. Soft skills
2. Language and communication skills
3. Life skills (Yoga, physical fitness, health and hygiene)
4. ICT/computing skill

1. Soft skills

The method and process of learning, stressed by the institute, encourages the students to conduct field visits, work in collaboration and source data from field visits with community interaction. It encourages such dialogues for the development of soft skills and confidence amongst students along with its academic learning outcomes. The formation of Students council, Annual festival AAKAR, participation in competitions, extracurricular activities focus towards the additional development of soft skills amongst the students.

2. Language and communication skills

The institution inspires and urges the students to participate in competitions like essay writing, writing research papers and presenting works for design competitions. This not only improves their language, narration and communication skills but also gives them recognition.

### 3. Life skills

The institute believes in creating a culture where students are prepared with good life skills and are able to manage good physical and emotional health for healthy living. Seminars are held by motivational speakers and experts imparting the knowledge and techniques to manage life amicably and with a healthy spirit. Lectures on Physical health care, emotional healthcare, life coaching practices, workshops on Yoga, Self-defence, Pranic Healing etc. are conducted which help them learn these life skills. The institute also has a counsellor who helps the needy students address their issues.

### 4. ICT/ Computing Skills

The institute includes learning of various soft wares like Auto Cad, Revit, Sketch up and GIS as an Elective in the 2<sup>nd</sup> and 5<sup>th</sup> year. Compulsory learning of such soft wares enhances their drawing, presentation and data sourcing skills. In addition to classroom teaching of the soft wares the institute is equipped with a well-equipped computer lab and several books in the library on the above soft wares assisting them to learn. This gives them an added benefit with respect to job opportunities in the market.
